Gentlemen of the Trade:

Gentlemen of the Trade:

Everything points to a continuance of healthy business in 1949 and for some years to come. Customers are shopping though for quality stock that is priced right. You may ask just how one can price an item "right" when costs are still rising. We're doing it by more efficient operation and by a continued striving towards better propagating methods. Our program has enabled us to shave some prices and hold the line on all others. These s(h)avings we pass on to you to help you set that right price and to reflect in your end net profits. As for quality—we have it. Our experiences in the past 28 years have given us the know how to produce quality stock that assures you the best. And don't forget packing. It is our pride to pack well and it pays.

We are certain that you

Favor us with your orders then. will be well satisfied. Yours sincerely,

JOHN VERMEULEN & SON, Inc.

TERMS AND CONDITIONS OF SALE

PRICES: Prices quoted herein cancel those in all previous lists and are subject to change without notice. They apply only to bona fide nurserymen, florists, landscapemen, etc. Please use printed stationery or enclose business card when ordering. printed stationery or enclose business card when ordering. Add \$1.00 to all orders under \$10.00 to cover the costs of handling. This charge will be made C. O. D. or billed as the occasion requires if not included with order. B & B stock packed at cost. TERMS: Cash with order — no packing charges or 50% cash with order, balance plus packing charges C. O. D. No discounts. To those with established credit terms are net 10 days. NOTICE: All stock is subject to prior sale. Orders will be accepted only on condition that they may be voided due to crop failure, inclement weather, drought, fire, frost, strike, etc. We reserve the right to delay shipment to the best interest of the plants.

Sentinalis Pilaris

Pyramidalis

Stricta

FOR SALE

We're relocating the entire business in New Jersey. Levitt & Sons and a few other builders are driving us out with houses springing up like mushrooms all around us and leaving no room for expansion. For a retail Florist or Nurseryman this location would be a dandy. A garden store on this site would be most profitable for there are 1,500 new garden type homes within wheelbarrow or kids wagon distance and more than 5,000 others within a radius of 10 miles.

On this 60,000 sq. ft. of good black soil are 4 greenhouses

and a lean-to with approximately 7,000 sq. ft. of glass, a heated two car garage and work building with boiler room beneath, a heated work shed and a modernized 6 room story and a half house in perfect condition. There is 300 feet frontage on main road with bus route. Can be divided into two sections if desired. Also 9 acres partially cleared with 300 feet frontage on N. Y. Route 25, Jericho Turnpike, in Syosset, N. Y.

TAXUS

TALL NARROW HARDY

For many years the nursery trade has been looking for a hardy yew that is narrow and compact yet having a normal rate of growth. They are sorely needed for confined plantings, formal hedges and gardens, apartment house and store plantings, and a score of other uses where juniper, thuja, etc. are not practical or wanted. With these ends in mind 30 Taxus media seedlings were chosen in 1932 for testing. In 1946 after 14 years of discarding and testing for hardness, growth habit, color, freeness of disease, propagation ease, sales appeal, etc. four types were offered to the trade and in 1947 three others—all in small sizes. This year we offer some larger sizes and soon will have B & B. Every-one who has seen our stock plants has commented very favorably on them. Everything points to a future public demand. future public demand.

TAXUS MEDIA PILARIS—Pillar Yew

Narrow habit about mid-way between Pyramidalis
Sentinalis. Needles are gracefully long and narrow
medium dark. Branches slope upward and are short. and

TAXUS MEDIA GRANDIFOLIA—Bigleaf Yew a Similar in shape and growth to Pilaris but with very much longer needles. The effect is rich and unusual.

TAXUS MEDIA PYRAMIDALIS—Pyramidal Yew A strong grower with verticle branches and striking black-

recen needles. Truly a rich, showy, fullbushed column.

TAXUS MEDIA ROBUSTA—Obelisk Yew a, b, c, d, e
Similar to pyramidalis in growth but heavier branched, giving
a more sturdy or robust appearance. Large glossy needles.

TAXUS MEDIA SENTINALIS-Sentinel Yew Sold out The most surprising of all. Sufficiently clothed with short foliage and branches to cover the main stem.

TAXUS MEDIA STRICTA—Narrowbush Yew a, b, c, d
Narrow and a bit dwarfish which along with short thin needles give a compact effect. Branches almost verticle.

TAXUS MEDIA VERIDIS-Grassgreen Yew AXUS MEDIA VERIDIS—Grassgreen 10.

Long, gay bright needles both Winter and Summer. A faster verticle branches. We think grower than the rest with almost verticle branches. We it is one of the best. See page 4 for Rooted Cuttings.

GABLE HYBRIDS — Extremely hardy kurume type azaleas withstanding 20 degrees below zero with only slight injury to some. Beautiful flowers, single and double, gorgeously shaded. Some evergreen. Bred through many years research by Joseph Gable, Stewartstown, Pa.

Selection of 5 each of 5 varieties — 21/4" pot — \$6.25. Under no circumstances can numbered varieties be named without permission of Mr. Gable.

HINO-CRIMSON — Clear, crimson-red flowers make striking contrast to the glossy, dark-green foliage. Another all important feature is the fact that the flowers do not fade as do the hinodegiri and hold the clear color until finished blooming. Excellent for forcing and hardier than hinodegiri. Color print sent on request.
